## PRODUCT DESCRIPTION

### Features

Bassett Back Support Range provides back lumbar support for lower back pain sufferers, allowing for the spine's natural curvature.

- Can be used in the car, office, lounge etc.
- Allows air circulation and prevents perspiration
  - Light weight
  - Portable
- Easy to carry

Unfortunately, there are too few well designed seats. This includes so called "easy- chairs" and car seats which may after a time contribute towards back trouble, especially in the lumbar region and also aggravate existing problems because of incorrect posture which burdens the muscles and vertebrae with undue strain.

It has not only been useful for arthritics and patients with back injuries but also in general use for work positioning and sitting." Due to the support given by the design. in which the vertical plane is curved, supporting the spine to help retain posture by supporting sideways movement.

Open mesh Allows the air to circulate, thus preventing undue perspiration, reducing clothing stain and rotting of materials while giving firm comfortable support.

Available in 2 Sizes Standard and Heavy Duty. The heavy duty has a more pronounced lumbar support.

An optional lambswool cover is also available.

Note: The Bassett is one of our most popular back supports. It does use up more room than most other travel back supports. This can be a problem if the user is very tall and the support is being used in a car that has limited seat adjustment.

### **Specifications**

<b>Height:</b>	11cm
<b>Width:</b>	39cm
<b>Length:</b>	44cm
