PRODUCT DESCRIPTION

Features

Sculpt Ergonomic Desktop is designed for productivity, with an eye on ergonomic excellence. By providing a relaxed, comfortable computing experience, it enables you to work without the stress, strain, and discomfort of other keyboards and mice you may have used in the past.

- **Keyboard:** built on ergonomic principles with a split keyboard design helps to position wrists and forearms in a relaxed, natural position. The domed keyboard shape reduces wrist pronation. Natural Arc key layout mimics the curved shape of the finger tips. Cushioned palm rest provides wrist support and promotes a neutral wrist position.
- **Separate number pad:** provides greater flexibility for workspace setup. Enter numbers with the right or left hands or push away when not needed to create a compact keyboard bringing the mouse closer to the body.
- **Mouse:** contoured for right hand and with less pronation than a standard mouse for wrist comfort. Thumb scoop helps maintain correct hand and wrist position. Back button for faster navigation.
- The only split compact keyboard bundled with numeric keypad and mouse.
- No software download necessary for full functionality
