PRODUCT DESCRIPTION

Features

The height adjustable Tri Stool is a very useful seating option especially when a higher sitting height and good posture is needed. It also offers an alternative to standing; when foot or leg issues affect standing abilities. It is also an excellent seating option for those needing to sit low.

As with our other saddle style stools, the Tri Stool helps maintain an upright posture when sitting by allowing a more open hip angle and natural position of the pelvis. The three cornered design of the stool supports the pelvis, with the remainder of the body's weight taken through the legs and feet. The seat design though supportive and stable, allows more movement of the pelvis than a conventional stool or chair.

- Great for home use - kitchen bench, ironing or workshop
- Ideal in the workplace - at electric sit-stand desks or standing benches
- Drafting height 265mm gas-lift is standard providing a height range of 580 - 830. Different gas-lift heights are available.
